

Module 10 – jQuery Labs

Contact Form

In jQueryLabs.html create a simple contact form (it will NOT send any email). It should accept the following input from the user:

- Name (text)
- Email (text)
- First time visiting (check box)
- Referred By (dropdown list)
 - Options:
 - Default (Please Select)
 - Friend
 - Co Worker
 - Radio Ad
 - Newspaper
 - Internet Search
 - Other
- Please Specify (text)
- Comment (text)
- Submit (button)

Change the background color of the textbox that the user is currently typing in to lightyellow.

ONLY display the dropdown list if the user checks the check box.

ONLY display the Please Specify text box if the user selects 'Other'.

Contact Us

Name:

Bob

Email:

test@email.com

First time visiting? ☒

Where did you hear about us?

Other

Please Specify:

Marketing

Comment:

Great site!

Submit

Confirmation

When the user clicks 'Submit' display a confirmation message that contains the input from the user.

ONLY display Referred From if the user checked the check box

If the user selected 'Other' display the text they entered in the Please Specify textbox. Otherwise display what the user selected in the dropdown list.

Contact Us

Thank you!
